Matrices and Matrix Calculations - Spring 2017

Midterm Exam I, February 16, 2017

In all multiple choice problems you don't have to show your work. In all non-multiple choice problems you are required to show all your work and provide the necessary explanations everywhere to get full credit.

This print-out should have 17 questions. Multiple-choice questions may continue on the next column or page – find all choices before answering.
